Proposed Solutions to Excessive - Unwarranted Cable Traffic

1. On 14 March 1958, the O&M Staff, DD/P Area was directed to study the problem of excessive cable traffic, and to develop and evaluate methods and/or devices for diverting non-priority communications items from electrical to non-electrical transmission facilities. This study will include, but will not be limited to, an examination and evaluation of

25X1C

[redacted]

25X1C

The "Teletype Communications System", however, is still in the developmental stage.

2. Unless too many unpredictable factors affect the completion date of this study, it will be completed by 1 May 1958. I will provide you the first interim report by 1 April 1958 and
